(I've gotten some Allen hooks with eyes that weren't completely closed)

that can be said of ALL hook brands at one time or another

years ago, mustad was notorious for leaving the hook eye open. we just used a small build up of thread to remedy that situation

i have opened hook boxes from the most of the major brands and have found deformed hooks. some with odd bent shanks others with a flattened and unformed head.

i have ordered about \$100 worth of allen hooks over the summer to replace the green caddis outfitters hooks. i havent gone into all of the allen hook bags to check for the odd ball hooks. i'll find them as i use them or not!
