I looked it up. According to Wiki:

"The Tellico River and its main tributaries are renowned for their brook, brown, and rainbow trout fishing. Upstream from Tellico Lake, above Tellico Plains, Tennessee, the Tellico is a premier trout stream. It meanders through a mountain gorge before reaching the broad plains downstream of Tellico Plains."

Here's the link:

https://en.wikipedia.org/wiki/Tellico_River

And here's the link to the Tellico hatchery's "trout resources":

<http://www.twra4streams.org/troutres.html>

Interesting stuff.
