Midge Help!

I posted this question on the beginner blog but haven't had much traffic so I wanted to post it here to see/ get others who read some additional info.....

I wanted to try and start fishing Midges. I have read they can be very effective in fall seasons, as well as all year round.

Does everyone have best luck with a certain color? Is there a better color for different times during the year? What about sizes?

I should also add I am from Western PA.

Thank you for any help!
