For \$350 I would buy the H2 tomorrow. Hands down the nicest rod I ever cast, both the 7'6" 3wt mid flex and the 9' 5wt tip flex. I would imagine the 4wt is just as nice. The price they told me at the time was \$750 and that was supposed to be a discount! I wouldn't go near that price but \$350 I'd be all over it. It will definitely cast a streamer better than a superfine. Superfine is a dry fly guys dream were the exact words of the orvis rep. I've never been an orvis guy but the H2 is something special IMO. Get to a shop and cast it.
