i fished valley creek last thursday (10-24-13) and did very well. a piece of advise, fish very very light patterns. do not drag bottom with the nymphs, and do not wade. i dont fish over a size 18 there, and almost no weight (minus a 2.0 tungsten bead anchor and a brass beaded dropper). but the indicator isnt helping you out either. the creek is very low, so if you cant cast above the spot you want to fish, you are more than likely spooking them before your flies get to the fish
