I fish about the same amount of time for each, dry, nymph, and streamer. I have an 9ft Orvis hydro 5wt which i believe is the same blank as the H2, but its sorta overkill for some of the smaller streams I fish, although it is my favorite rod. I was sorta planning to get the 7' 6" 3weight or 7' 4wt for alittle more backbone to huck a bigger fly. Wow, this is a more tough decision than buying a car!!! Appreciate the info everyone
