Well I'm not sure when it is stocked, TU handles it not the state and I don't know how to look that up. But since there were 4 or 5 golden rainbows in the same pool I'd bet they were recently dumped in. BUt I stood near them for about 30 minutes and they didn't do this. I know they saw me. Another man came up to talk to me and watch them too, he was about 10 feet from them and they stayed still. I crossed about 20 yards up. I also saw them hiding under a boulder that must have a trench or something under it.

I could definitely be wrong, but it looked they were eating not fleeing to me.
