If you really want to fish midges, I highly recommend getting the book, Midge Magic. All of my patterns are based on what's in the book including Coats and Clark sewing thread for bodies. I do sometimes add small amounts of CDC wings and will tie a few with midge glass beads and the smallest tungsten beads. I fish 90% below the surface with the midge pupas.

As for tippet, I like a challenge and will start with 7x fluorocarbon and even go down to 9x when conditions warrant.

I fish midge pupas in various sizes and colors all year round.
