I too am from SWPA, and fish the Yough, Laurel, Loyalhanna, and a few other streams around and my most productive midge patterns have been the zebra midge in black and red size 18-22. I do prefer the smaller ones as a dropper. Olive does work well too. Sometimes I even tandem 2 zebra midges, sz18 bead head black followed by 12-16 inches of tippet and then a 22 red one or olive. Another fly in midge size that works well around here also in fall is a rainbow warrior
