G2 by Scott is butter. Very sweet stick. It really depends on what action you prefer. The H2 is a great rod and probably the only Orvis rod I've cast where the result was a huge grin and "I've gotta get one of those". I'll agree with the previous post that mentioned some models from a few years back that might work...Sage models z-axis or SP. Redington's CPS is another.

If you have a dealer close by, cast the G2 from Scott and the H2 mid flex. See which you like better.
