Well, at 6:00pm my doorbell rang and it was UPS and I was certain my rod was not gonna be in til at least next Wednesday, but it arrived. Immediately I opened the tube and assembled the rod and when in hand it felt like my own personal Excalibur. I put on my reel and line and did a quick test with some smaller streamers to see the action and man was I surprised! This rod easily handles a size 12 streamer and I was able to get about 40ft out with it pretty well with it, but the "feel" of the rod is like nothing else I own. I'm not a huge fan of slow action, but this rod deff has the backbone. Next I put on a dry, and I'm not gonna go crazy into detail but just say... Wow . I've wanted this rod for a very long time and man did it come at a good time cause I'm off this weekend, and it will be put to good use.
