It was a privilege to meet their acquaintances! I appreciate your eye on those details Dave. I'm sure that's why your paintings are so fantastic.

Went with the dry-dropper all day. About 50/50 on the dry vs the nymph. All of the fish were spectacular.

The best news of yesterday was that we caught a lot of fish in all different phases of development. 2 years ago I was concerned the numbers were down on this creek. And last year, I did not catch any of those 1st year 2-3" fish. Catching all of those 1st year fish yesterday restored my hope for this creek. Hopefully the genetics of that big guy are even more successful during this years spawn!
