Mcsneak,

If you have not hit the 20inch mark on wild trout, you are not trying to. If you want one, you let me know.

Thanks for the offer SBecker. I don't fish anywhere near as often as you do so that's one strike against me. I figure my best shot at one is Penns Creek and I got there all of 3 times this year. Caught plenty of fish each time including plenty of nice ones. I don't target big fish by swinging big streamers and quite frankly the biggest fish I've caught in that stream have come on smaller (#16) nymphs. I may have had fish on that were at or above the 20" mark but haven't landed one. I'll get one one of these days. If desperation sets in I know who to call.

To PatrickC - I believe they exist in a select few streams. Just not in any great quantity.
