I bought the prestige plus wf5f and didn't like it. The line I have does not float well at all. Has held up well but I rarely use it anymore. I heard it was made by SA for cabelas so I thought it would be better. I have a \$40 SA aircell I think it is and I like it much more then the cabelas \$30-\$40 plus. SA line is much slicker and floats way better IMO. I have to treat the first couple feet constantly to keep it floating. Reviews on cabelas web site are mixed some love it some hate it. I will never buy it again. They want you to think you are getting a \$100 fly line for \$30-\$40. But it's just a \$40 fly line IMO it's no SA gpx or rio gold etc.
