Fantastic Paco. When should I mark the calendar to meet ya up there?

Ghost,

In you neck of the woods there have been sightings of the youghness monster. Be careful where you walk because it's a 29.99" blood thirsty brown. One more meal and he might break 30".

If I were looking to break 30", there's at least 3 streams in SCPA that hold or have the ability to produce a beast. See posts from squaretail's monster truck post or some of the giants that grrenieweenie had posted. Better chance of seeing 30" than seein a big foot....except in Lancaster.
