Here's what I use.

4 to 5 feet 15lb Maxima Chamelon

barrel swivel

4 to 5 feet 2X - 3X fluro tippet.

Leave a nice tag at the barrel swivel and attach your shot to the maxima chamelon.

You can taper your butt 20lb down to 15lb chamelon if you want.

This rig is for bouncing eggs or nymphs not swinging buggers.

Yeah, this.
