Alby mentioned these guys last year: Guideline - <http://www.glpolarized.com/GEW/index.html> Looks like they offer reg and scrip glasses with a bonus bifocal option at pretty good prices. I am going to get a pair after my next eye appt in the spring.

They also have a line Fisherman - <http://www.glpolarized.com/FEW/index.html> that offer just none scrip with some very affordable polarized lens.

Polarization is a must and gonna go with Fishidiot and Millerstime this one and get something in the yellow-copper space.
