I have a pair of Oakley Two Face's for driving, and they are polarized Black Iridium lenses....TERRIBLE for fishing. It's either the Iridium finish, the color, or both. I'm guessing it's the color, because I have never been a fan of anything other than Amber/Bronze/Brown. I would go for either the Bronze or VR28 Black Iridium. Let us know what you pick too...because I need some new lenses! Ha
