You send it to sage with a \$50 bill taped to it and they will send u a new one.

Did u break it fighting a fish Jered? If so it appears you bent pats the 90. or put your hand above the grip to heavy hand the fish. either way it shouldn't break there except maybe when u lose a fish and break it over your knee.

I once "tested" a new line of cheap rods a guy I know was selling. First fish on first run downstream broke it in half just below the ferrule.

I told him what happened and he was Peeeissed! I said hey I tested it it is junk! Hope u didn't buy too many. 

But sage should back this one up.
