in winter I think I could only fish two patterns, woolly buggers and zebras. unless I have a BWO hatch I can go to the stream confident with those two patterns and know they will produce. woolly are an anywhere fly but as mention before slow pools, banks and riffles. I fish a riffle with a zebra first. usually tandem HE or PT with a zebra dropper. small is best is the winter. I start with a size 22 zebra and for a bugger 10 or 12.
