I own about 6 acres along Breastworks run in Somerset co (any of you are welcome to fish it) i have found that a gentle touch doesn't hurt anything. I talking about a few well placed rocks , planting a few things to stabilize the banks during floods etc. Kinda like a GOOD woman gentleness is greatly appreciated. They stop stoking well below me but there are natives and some of the stockies make it up , mostly brookies. There are still remnants of a dam/diversion we built in about 98 that has formed about 50 yards of great native brookie spawning area. TIGHT LINES ALL
