Hi Jack

I'm in the same boat as you, just not for the same reason. I have only fished a few times the last couple of years, and it's killing me! My problem is my health, I just can't get it together, it's just one thing after another. After fishing three or four times a week, sometimes more.

I hope both of us get it to get back into it next year. Myself I'm going to try like hell, to fish next year. I'm 70 years old by I know guys older than me who are still fishing.

I hope you do better next!

Good luck!

Paul G
