ryguyfi wrote: Is it a headache trying to thread the end of your tippet through the eyes of rod? Pull out enough line to get 10-15ft of fly line, double over the fly line and thread it through that way.

and a false cast or two once you get it through the guides will shoot the line into where you need it to go.

Also, to keep Clouser minnows at the correct profile, try diving the hairs on each side of hook point periodically while fishing.
