I'd say spring creek, there'll be BWOs hatching most days and access is easy. As a plus there won't be hunters there.

Remember to clean your waders well after fishing Spring Creek, mudsnails are present and we don't want to spread them.

I'm curious what you mean by hunters not being there. Do you mean that fishermen who are hunters won't be on the stream because they are out hunting? Or are you implying that hunters don't hunt along Spring Creek? Last time I checked, 1200 acres of the Canyon was open to hunting and one of the joint managers is the PGC.
