in the winter it zebra if that doesn't work a smaller zebra if that still doesn't work go to a sz 24 zebra and if that fails throw a bugger. if none of these work go home. in my experiences most fish are willing to take a zebra in the winter month. I also think stepping it up a size helps it stand out. my usual setup is a tandem PT to a zebra or a San Juan worm to a zebra. stockers love it wild fish like so you cant beat it.

winter I also carry eggs worms stones and never forget your BWO's.
