I love FlyStop and I appreciate the extra expense they go through to print out a color list of each fly I ordered. As a newbie that really helped me figure out what on Earth I paid for, and then to attach a name to flies that worked.

The flies themselves range from about a 3-7 on a 1-10 scale. Nothing is amazing and most of the flies only survive 4 or 5 trips (unless a tree spares them first), but there are a few diamonds in the rough and the price/speed is the real kicker. I've probably spent \$300 or so there since my addiction began 2 years ago
