Fished Yellow Creek yesterday for approx 6 hours from 7:30 to 1:30. I stayed in the lower third of the project water.

Picked a decent amount of fish underneath, mostly on a yellow yarn egg or a 18 PT flashback. Caught a few more on top with a little cdc olive emerger reminiscent of a Charlie Craven Mole fly.

Most exciting part of the day was 20 inch + (by 20 inch plus I am being conservative in deference to the thread about 30 inch browns on the main page) brown that T-boned the 10 inch fish I caught on a mole fly.

All in all a good day, weather conditions were nice and cloudy...BWO activity was sparse but enough to bring a few to the top.
