Re: Article 1

It's titled "What America's Forests Looked Like Before Europeans Arrived"

But the article is about the findings at one specific spot, the edge of a floodplain, where it meets the hillslope, on a small low gradient limestone stream in SE PA.

To generalize the findings at that one specific site out to "America's Forests" is very bold!

Here is the study.

<http://www.plosone.org/article/info%3Durn%3Aurn%3Apubmed%3A27717197>

May prove more informational than the Yahoo article.
