Dear Board,

The report mentions no trout other than brown trout. The last time I fished it, admittedly 15 years ago, I caught rainbow trout which no doubt escaped from the "club" waters up near 940. I quit fishing it then.

From 1987 to 1992 I probably fished it 3 times a season. I covered the whole stream from Rte 534 to Rte 940 in various stages.

If it fishes today like it fished back then I might give it another try with the following caveat. You can't be on it with other people unless they are in your party and you take turns fishing. I learned that the hard way after several long and fruitless walks.

The only way to fish it is to take turns. It's a three guy and one rod kind of stream. Walk in across from the golf course and fish upstream slowly. You'll catch plenty of fish and some nice ones too.

You probably don't want to go alone either. Not because it's an arduous hike, but because you are far enough off the road that should anything happen to you you might be SOL unless you get lucky.

Regards,

Tim Murphy 😊
