Great follow-up and nice to see that action was taken on angler feedback. I've fished Black/Hayes on a few occasions in the past and only found brook trout. This was the stretch from 534 upstream to where the stream splits. I'm assuming that the stream that goes to the left (north) is Hayes as Black Creek goes northeast? ...

WG, the stream is listed as Hayes Creek on some maps and Black Creek on others. At the split Hayes/Black Creek goes to the left and Fourth Run to the right (northeast).
