FWIW, be prepared to drop another \$30-50 for studs / cleats.

....or buy the 3/8" Kold Kutter screws 

http://koldkutter.com/catalog/index.php?cPath=21_22

Has anyone done a comparison between these studs and the more expensive ones like Simms and Orvis?

Also, how do you decide whether 3/8 inch or 1/2 inch are the best for your shoes?

If 1/2 inch looks a little too close, i.e. that they might end up coming through the sole, is there much disadvantage to using 3/8 inch studs? Are they much more likely to pull out?
