6/0 and 8/0 Uni-thread are the best materials IMO. Fine, strong, and supple.

Fine monofilament sewing thread (just super fine mono) is usable but is much thicker in comparison to Uni-thread. Some folks like mono furled leaders but they are junk as far as I'm concerned.

Try a search of the board for "furled leaders" we had several long threads with plenty of info and different opinions.

Kev

I've never used mono, but +1 to the uni thread. I've only used 6/0.
