Big Spring/Newville????

I have the day off tomorrow and wouldn't you know it...a warming trend!!! How's that for luck? Anyway, thought about venturing up to Big Spring in Newville and give it a go.

It will be my first time on this creek so I have little knowledge other than what I have found on this site and other articles.

Without giving up anyone's "spot", what are the better sections to focus on? don't mind prospecting a bit, but since its only a short trip I would rather make it a little easier.

Also, where is the "Ditch?"

Any help would be appreciated.
