I've also had mine for about 3 years now. I really like it. It has held up well and looks almost new. Its the perfect size for most trips- big enough to carry all your flies, a rain, jacket, snacks, and water but not too bulky. The magnet feature is really nice and you can rest flies on it while you tie tippet on etc. The only thing i don't like about mine is that it rests right where i like to put the fighting butt when leveraging big fish. Other than that minor issue its been great.
