On a map, locate creek mouth to headwaters/spring. The ditch is just below the spring. You can travel the entire stretch by car in less than 15 minutes and see the water nearly the whole way. The upper portion is not stocked by PFBC. The closer you get to the ditch, the more stream-bred trout will dominate. Like Spring Creek, there is no bad place to put in. Just start walking and observing. Stay out of the water until you know what you want to do fishing-wise.
