I just bought a pair of Cabelas Light Weights with studs myself. The studs on my older Orvis boots are wearing down and I was doing a lot of "skating" last time on Penns. If Cabelas would have had non-felt studded boots under \$100 I might have bought a pair to give them a try. I'll continue to wear the Orvis on small mountain streams where the studs don't matter and save the new ones for Penns, Lehigh, etc.
