albud,

there have been rumors that the private water upstream of the rock, along trout road, is/was stocked. These are rumors and should not be taken too seriously.

No doubt natural reproduction goes on in upper spring creek (not saying wild fish). One stretch in particular has a good and growing number of YOY caught. Larger fish in the area are caught too. It's hard to tell the source. These fish obviously came from the hatchery at one point. The open discussion is how much repro, if any, is going on.
