I would recommend a stripping basket it can become a real pain without it. As far as tides usually 2 hours before and 2 hours after high tide but that can be different for each area.(Just a general guideline). As far as time of day it cant hurt to try dusk or dawn if you can.

Another thing i forget to add make sure you wash your rod and reel off well. It cant hurt to strip some line off of your reel and let it sit in fresh water for a while. Also wash clippers and forceps off as well.
