troutbert – I didn't suggest stocking those streams...

Spring Creek, Fishing Creek, Penns Creek, Little Juniata, Letort, Falling Spring, Slate Run, Cedar Run are all Class A streams. And all these streams were stocked in the past.

The streams discussed in the original post are also Class A streams. That are currently stocked.

So the streams discussed in the original post and the streams I mentioned are in the same category, i.e. they are Class A streams.

Do you favor stocking some Class A streams, but not other Class A streams? And if so, how do you think it should be decided which are stocked, and which not?

These questions aren't just for fishfuzz, they are relevant questions for anyone interested in the topic.

(My view is that Class A streams should not be stocked.)
