I'm with krayfish on this one but instead of a swimming pool let's just open up the hatcheries to the meat heads and worm dunking types so they can fish right in the raceways. This way the PFBC can save money on fuel and stocking costs and we don't have to deal with them ramming around on the water in the spring. Maybe with all the money they save we could see more wild brooke trout enhancement areas or more stream restoration projects like at big springs?
