I have all the info you would need here at the shop. middle of may to first week in june has the heavy hatches. Have had a few guys float it during late april as well. you can float it during the summer (normal) with a yak. better for bass then but can still find trout (they don't die off as some think) if ya come up stop by and we can give up to the minute reports during the season. I am in Ansonia across from the boat launch.
