Between hackle and CDC they both are going to take a chunk of change out of you pocket. If you buy in bulk its not that bad. I was going to pick up a pack today at TCO but I needed other materials and gas money to get to school. Only 18 bucks and it probably would be able to go further then a whitting 10 pack.

Caddis you can use the whole piece of CDC BWO I only use tips. Then I usebtge rest in emergers snd nymphs.

Regardless dries are going to be more expensive because the stuff the makes a fly float is not cheap.
