Hope you got the answers you're looking for.

The ITB rods should be released in some light weight trout sizes in the next month or so. We're looking to start with a 7'6" 3wt and 8'6" 4wt to start. Then bringing out a 6 and 8 wt before the bass season starts.

Our Ichthus reels are all over the country and even a handful in Canada. We haven't had a complaint yet from them and people are catching anything from mountain stream trout to musky and salmon on them. Great drag that has some good stopping power.
