I am looking forward to using it for 90% dries (12-18) but the occasional dry/dropper (maybe a size 12-14 stimi with an 16/18 beadhead prince/pt/copper john) or with just a size 12 bead head bugger style streamers for smaller trout in some closer quarters. If I do go back out west to Colorado, this is what I would be bringing for Rocky Mountain National Park and places like that.
