What boychick says is ideal, 10' 7 wt is the best. More important than the rod is the reel, it must have a strong smooth drag.

I used to think this, and by all means if you like a good drag use one, but I've used 2 click/pawl reels for steelhead now for a few years and I don't feel like I'm at any disadvantage. Plus I love the sound when a fish takes off. Again, not disagreeing. Different reels for different folks is all.
