To follow MKern's post,

Small streams or shallow runs:

- 1) Dryfly
- 2) Pinch-on foam
- 3) Colored mono/backing built into the leader

I will also use a combination of 2 & 3 at times.

Bigger Streams and deeper runs:

- 1) Pinch-on foam
- 2) Colored mono/backing built into the leader
- 3) Yarn
- 4) Dryfly

Again I will use a combination of 1 & 2

I have been expermenting with a no "bobber" method, but find myself putting on the old indicator.

JH
