Some other examples of what this stuff is ACTUALLY about.

In 2003 the PFBC proposed taking sections of the following wild trout streams off the stocking list. These were Class B wild trout streams. Modest sized forested freestone streams with wild trout throughout.

Cooks Run, Clinton

W. Br Hicks Run, Cameron & Elk

Upper Jerry Run, Cameron

Wolf Run, Centre

I'm pretty sure their intent was not to reverse 1800s deforestation. The intent was to improve trout populations in those streams.

TU supported this PFBC proposal. The other side opposed it. The other side won.

This is the way politics works. There are two sides on the issue, and they advocate for what they want.

The question I'd ask fellow flyfishers is "Which side are you on?"

Do you support the PFBC in ending stocking on these wild streams? Or do you oppose them?
