Sasquatch, I still have an old Sage 590-4 SP that still casts well. I am going to dig it out again this season. I think the emphasis on fast rods is killing castibility. I find myself going back to glass & cane. But there are some old graphite rods that still have it - Sage SP, RPL & LL, the original Scott G series. I am curious about the new Sage Circa series. The old Winston IM6 rods were great also.

But I did get rid of my old Orvis HLS rods, a 590-4 and a 690-4. Now they felt like broom handles.
