A well made fast action graphite rod is an excellent fishing tool that has a lot of feel. It is not stiff and does not need to be over lined.

Sasquatch, without knowing your glass rods, I am willing to bet a few are fast action rods. A fast action grass or glass rod would be considered slow by many fishermen today. For comparison a fast action grass or glass rod is probably similar in action to a medium action graphite rod made by an old school traditional builder such as Thomas and Thomas, C.F. Burkheimer, R.W. Winston, House of Hardy, or Tom Morgan Rodsmith, to name a few.
