I had the opportunity to attend my very first Western Pocono TU meeting last night and what a great evening it was. One of their members took it upon himself to organize a program with 5 of the Land Conservancies and Trusts working in the Poconos area. The program aimed to introduce these groups and to give the public a better understanding of what they do. It was a full room, including a local TV cameraman and several newspaper reporters as well as staff from at least one local legislator's office (they were all invited.) The programs was a success and the refreshments were excellent as well! I even learned of some newly opened places to put on my list to explore. I look forward to attending more of this chapter's events and I felt they deserved some recognition here.
